Letter of Recommendation

As a Professor and Dean of the School of Engineering and Applied Science at Ahmedabad University, I recommend Sarthak Bharad to your esteemed university's Master's program. I have closely observed Sarthak's academic journey over the past four years.

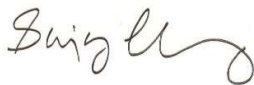

Sarthak pursued the Bachelor of Technology with CSE programme offered by the School of Engineering and Applied Sciences, Ahmedabad University and recently graduated in the year 2023.

During his time at the university, he was a student of the course "Operating Systems" taught by me. The course covered essential topics such as process management, memory allocation, file systems, and I/O systems. The course typically combines theoretical concepts with practical exercises, assignments, and projects to reinforce the understanding of operating system principles. Students often gain hands-on experience through programming assignments and projects that involve working with system-level programming and interacting with operating system APIs. Sarthak consistently displayed a solid grasp of the subject matter and actively participated in group discussions, highlighting his eagerness to engage in the learning process.

Based on his performance in the course, I am confident that Sarthak Bharad possesses the skills and versatility to excel in any endeavor he chooses to pursue. I strongly recommend you to consider Sarthak for any academic or professional opportunities as I believe that he will make significant contributions wherever he goes.

If you have any further questions or require additional information regarding Sarthak Bharad, please feel free to contact me

Sincerely,

Professor Sanjay Chaudhary
Professor and Associate Dean, School of Engineering and Applied Science,
Ahmedabad University,
